About Us

Barakah Trading & Consultancy is a Bangladesh-based trading and consultancy firm specializing in glass, aluminum, ACP, ceiling, and architectural solutions. We provide end-to-end support for residential, commercial, and corporate projects through a reliable network of experienced fabrication partners and suppliers.

Our scope of work includes design coordination, material supply, project supervision, and professional execution to ensure quality, safety, and timely delivery.

Barakah Trading & Consultancy offers services across all major cities and regions of Bangladesh, with a strong focus on transparency, quality control, and long-term client relationships.

Vision

To become a reliable and respected name in Bangladesh's glass, aluminum, and architectural solutions industry by delivering consistent quality, practical innovation, and dependable service through professional execution and strong industry partnerships.

Mission

Our mission is to provide high-quality glass, aluminum, ACP, ceiling, and architectural solutions that meet safety standards, design requirements, and client expectations. We are committed to delivering cost-effective, customized, and timely solutions through efficient coordination, quality control, and trusted execution partners across Bangladesh.

MESSAGE FROM FOUNDER

- At Barakah Trading & Consultancy, our focus has always been on delivering reliable solutions through professionalism, transparency, and quality control. We believe that successful projects are built on clear communication, responsible coordination, and a strong commitment to client requirements.
- By working closely with experienced industry partners and execution teams, we ensure that every project is handled with care, technical understanding, and practical efficiency. Our goal is to build long-term relationships by consistently providing dependable service, quality materials, and timely project delivery across Bangladesh.

Core Value:

Quality First

We ensure premium-grade materials & services.

Innovation

Adopting modern design approaches and practical solutions

Integrity

Ethical business & long-term trust.

Customer Focus

Client satisfaction is our top priority.

Timely Delivery

Projects completed on schedule.

Safety & Sustainability

Safe practices & eco-friendly approach.

OUR SERVICES

Glass Partitions

Glass partitions are modern dividers used to create separate spaces without blocking natural light. They provide an open, elegant, and contemporary look while maintaining privacy and functionality, making them ideal for offices, homes, and commercial interiors.

Soundproof Glazing

Soundproof glazing is a specialized glass solution designed to reduce noise transmission from outside or between rooms. It combines multiple glass layers with acoustic interlayers to block unwanted sound while maintaining clarity, comfort, and energy efficiency, making it perfect for offices and homes.

Sliding and Bi-fold Doors

Sliding and bi-fold doors are space-saving solutions that bring style and functionality to interiors. Sliding doors move smoothly along a track, offering a sleek and modern look, while bi-fold doors fold neatly to the side, opening up wide spaces. Both options maximize natural light and enhance accessibility.

Shower Enclosures

Shower enclosures are stylish, functional glass structures designed to create a separate bathing space within the bathroom. They help contain water, keeping the area clean and dry, while adding a modern and elegant touch. Available in various designs and finishes, they combine comfort, durability, and aesthetic appeal.

OUR SERVICES

Bend Glass

Bend glass, also known as curved glass, is specially processed glass shaped into smooth, curved forms without losing strength or clarity. It offers a modern and elegant design element, often used in facades, partitions, railings, and furniture to create a sleek, seamless, and visually striking appearance.

Curtain Wall

A curtain wall is a lightweight, non-structural outer covering of a building made primarily of glass and aluminum. It enhances natural light, provides thermal and sound insulation, and offers a sleek, modern façade. Designed to resist air and water infiltration

ACP Cladding

ACP cladding (Aluminum Composite Panel cladding) is a modern exterior finishing solution made of lightweight, durable panels. It offers a sleek appearance, weather resistance, and low maintenance, making it ideal for building facades, signage, and interiors.

Spider & Cable System

The spider and cable system is a contemporary glass façade solution that uses stainless steel spiders and tension cables to support large glass panels without heavy frames. This system creates a transparent, sleek, and minimal look, allowing maximum natural light while ensuring strength and stability.

OUR SERVICES

Glass Roofing

Glass roofing is a modern architectural solution that uses durable, specially treated glass to create transparent or translucent roofs. It allows natural light to flood the space while providing weather protection and insulation. Often used in atriums, patios, and commercial buildings

Automatic Sliding Systems

Automatic sliding systems are modern door solutions that open and close smoothly using sensors or motorized mechanisms. They offer convenience, accessibility, and a sleek appearance, making them ideal for commercial spaces, offices, and high-traffic areas while enhancing safety and energy efficiency.

glass canopy

A glass canopy is a sleek, modern overhead structure made from tempered or laminated glass, often supported by metal frames or brackets. It provides protection from sun and rain while allowing natural light to pass through, enhancing the entrance or outdoor spaces with elegance and contemporary style.

Gypsum Ceiling

Gypsum ceilings are lightweight, versatile ceiling solutions made from gypsum boards. They offer a smooth, elegant finish and can be easily shaped into various designs, including false ceilings and decorative patterns. Gypsum ceilings help with insulation, soundproofing, and fire resistance

OUR SERVICES

Wooden Ceiling

Wooden ceilings are stylish and warm interior solutions that use natural or engineered wood panels. They add elegance, texture, and a cozy ambiance to any space while providing durability and sound insulation. Popular in homes, offices, and commercial spaces

PVC Ceiling

PVC ceilings are lightweight, durable, and low-maintenance ceiling panels made from polyvinyl chloride. They are resistant to moisture, termites, and corrosion, making them ideal for bathrooms, kitchens, and humid environments. Available in various colors and designs

Mineral Board Ceiling

Mineral board ceilings are durable, fire-resistant, and moisture-resistant ceiling solutions made from mineral fiber materials. They provide excellent sound absorption and thermal insulation, making them ideal for offices, commercial spaces, and modern interiors.

Aluminum Suspended Ceiling

Aluminum suspended ceilings are lightweight, durable ceiling systems made from aluminum panels hung below the main structural ceiling. They offer a modern, sleek look, excellent corrosion resistance, and easy maintenance. Commonly used in offices, commercial spaces, and industrial areas

OUR SERVICES

Acoustic & Louver Systems

Acoustic and louver systems are architectural solutions designed to manage sound and airflow efficiently. Acoustic systems reduce noise and enhance sound quality in interiors, while louver systems allow controlled ventilation and light. Together, they improve comfort, functionality, and aesthetic

Stainless Steel (SS)

Stainless steel (SS) is a durable, corrosion-resistant metal known for its strength, sleek appearance, and low maintenance. Widely used in construction, interiors, and fixtures, it combines functionality with a modern, polished look, making it ideal for both decorative and structural applications.

Mild Steel (MS)

Mild steel (MS) is a strong, versatile, and cost-effective metal commonly used in construction, fabrication, and structural applications. It is easy to shape and weld, making it ideal for frameworks, gates, and industrial projects, while offering durability and reliability in everyday use.

Glass with PVC Profile

Glass with PVC profile combines clear or tempered glass panels with durable PVC frames to create lightweight, low-maintenance partitions, windows, or doors. This system offers insulation, weather resistance, and modern aesthetics, making it ideal for homes, offices, and commercial spaces.

OUR SERVICES

Customized Architectural Fabrication

Customized architectural fabrication involves designing and creating tailor-made building elements to meet specific aesthetic and functional requirements. Using materials like glass, metal, and composites, this service delivers unique, high-quality solutions for interiors, façades, ceilings, and structural components

Elevator glass lift

Elevator glass lifts are modern vertical transportation systems featuring transparent or semi-transparent glass panels. They provide a sleek, contemporary look while allowing natural light and visibility, enhancing the aesthetics of commercial and residential spaces.

ADDITIONAL SERVICES

Barakah Trading & Consultancy provides a wide range of glass, stainless steel, aluminum composite panel (ACP), ceiling, and mild steel solutions for residential and commercial projects. Our services are delivered through a coordinated approach involving experienced industry partners, suppliers, and execution teams. We focus on ensuring proper material selection, quality supervision, and dependable supply support to meet design requirements and project needs. Our commitment is to deliver reliable solutions that balance functionality, durability, and professional execution across projects of varying scales.

WHY CHOOSE US?

In here, we take pride in being your trusted partner for high-quality glass and aluminum solutions. Our commitment to excellence, innovation, and customer satisfaction sets us apart in the industry. Whether you're looking for durable products, professional services, or reliable support, we have you covered.

Reasons To Choose Us:

Quality Materials –

We use only premium-grade products to ensure durability and excellence.

Licensed & Registered –

Barakah Trading & Consultancy is legally approved and registered with a valid trade license.

Skilled Workforce –

Experienced professionals delivering quality craftsmanship.

On-Time Delivery –

Projects completed within schedule, without compromising quality.

Quick Response –

Dedicated team for fast customer support.

Service Commitment –

Selected products include warranty, along with reliable after-sales support.

Customer Satisfaction –

We prioritize client needs and ensure long-term relationships.

Reliable Partner Network

We work with experienced fabrication partners and trusted suppliers to ensure dependable project execution.

Customized Solutions –

Tailor-made services according to client requirements.

Sustainable Practices –

We focus on eco-friendly and energy-efficient solutions.

QUALITY ASSURANCE

Quality is a core priority at Barakah Trading & Consultancy. We ensure that every project is handled with proper material selection, structured coordination, and responsible supervision to maintain consistent standards.

Our quality approach includes:

Careful sourcing of materials from trusted suppliers

Pre-execution planning and technical coordination

On-site supervision and monitoring

Compliance with safety and structural requirements

Final inspection before project handover

Through organized management and collaboration with experienced execution partners, we aim to deliver reliable, durable, and professionally finished results across projects throughout Bangladesh.

THANK YOU

We look forward to a future where barakah trading & consultancy continues to grow with integrity, innovation, and excellence. We are grateful for the opportunity to build, learn, and contribute through this journey, and we sincerely thank the company for the trust and support provided. We invite all related stakeholders to stand with us, support our vision, and be part of a shared path toward long-term success and sustainable growth.
